Make a Mask inspired by Lady J Day

Things you need to make the mask base:

- Template print out
- Scissors
- Glue stick
- Thick card (an old cereal box works well)
- Lollipop stick
- Sticky tape

Stick the mask template on a piece of thin card with a glue stick and then cut out.

Cut out the eye holes – poke a hole in the middle of the eye shape with your scissors and then cut around the outline.

Use some sticky tape to stick a lollipop stick to the back of the mask so you can hold it up in front of your face.
