

BORDEAUX

SCIENTIST

ACTIVITIES

ACTIVITY ONE

BECOME A CURATOR OF YOUR OWN CURIOUS COLLECTION

The Bordeaux Science and Nature Museum is home to a few unusual characters including the Dogue de Bordeaux and the Flying Dragon (actually a type of lizard).

<https://www.museum-bordeaux.fr/en/accueil/espece-de-specimen>

If we asked you to curate your own museum of science and nature, what would you put into it? Which animals would you include (or maybe you wouldn't?!) and why? What crazy but useful inventions would you put in your museum? Add a drawing below.

ACTIVITY TWO

ALL GREEN

Bordeaux's commitment to ensuring its green future has been designed around the city. Much like Bristol, evidence of green initiatives are everywhere from encouraging green tourism, a sustainable tram network linking areas of the city as well as a V3 bike scheme. Not only this, some places in Bordeaux have also been designed to generate electricity as well!

Design a gadget that could be useful for tourists in Bordeaux using green energy - what might it include? How might it work? What would tourists be most interested in? Draw your gadget below and write a description

[illegible]
